Mr. Gary Burningham
President
Rock Creek Gypsum, LLC
95 North 200 East
American Fork, UT 84003

Dear Mr. Burningham,

This letter is to document our meeting in my office with you, Brandon Steele, Duane Resare, and myself on June 10, 2010, to discuss the coordination of your special use permit relative to your mining operation and associated use. There have been some issues raised by Robert Steele, working through the State Division of Oil, Gas and Mining to update deficiencies of the Small Mining Operations Notice of Intent, as the special use permit is in Rock Creek Gypsum, LCC's name, not Robert Steele. In our meeting, we agreed to the following:

1. Since this is a split estate, you will continue to work through the State of Utah with a Mining Plan and Notice of Intent. The State of Utah will coordinate this effort with the Forest Service.
2. You will work through the State of Utah to clear deficiencies in the Notice of Intent.
3. You will work to have the existing reclamation bond transferred into your company's name, Rock Creek Gypsum, LLC. This will be completed prior to operations commencing this year. The State of Utah may choose to increase the amount of the bond relative to the work and disturbance you plan to complete in the future.
4. The Forest Service will continue to administer for the terms and conditions of your special use permit and approved Plan of Operation.
5. It is important to keep the lines of communication open. E-mails with names, dates, and titles from you will suffice when appropriate.

I felt our meeting was informative and productive. If you have any questions, please do not hesitate to contact myself or Duane Resare at 801-798-3571.

Sincerely,

DOUGLAS H. JONES
DISTRICT RANGER
